Swine Flu Briefing 49 – 27/12/2009

Author: David Hutcheson MBCI, Managing Director of Glen Abbot Ltd.

Current Situation:

In England this week it is estimated that there were 6,000 new cases down from 9,000 last week.

Weekly consultation rate for flu-like illness in England, Wales and Northern Ireland (all ages)

In Scotland last week the number of cases was 6,300 down from some 8,000 the previous week

In Europe and the USA the levels continue to fall, only central and western Asia still show increased levels.

Again a short briefing this week as the news is slow and I am sure many of you are on holiday. As the swine flu pandemic seems to have largely lost its steam at the moment I will look at whether this briefing is still of value as the New Year starts. If any of you have views please email me and I can take my lead from there.

In the mean time a Happy New Year to all of you!
